# SmartVax

SmartVax is a software program using SMS technology, designed to actively monitor the safety of all vaccines given in general practice and vaccination clinics in Australia. SmartVax is free for practices, fully automated and runs in the background, requiring no interaction.

A new optional intelligent fully automated SMS reminder service is now available at a nominal SMS cost. A link to your online booking system may be added within the text for patient convenience.

Charlie is due for his next vaccination. Please call 1234 5678 to book an appt or disregard if not relevant. Please do not reply.

NOW WITH
FULLY AUTOMATED SMS REMINDERS
FOR CHILDHOOD VACCINATIONS

Are you looking for a better way to
send childhood vaccination reminders?

● Would you like to save time and money?

● Would you like to increase the childhood immunisation rates in your practice?

SmartVax now includes **fully automated SMS reminders** for childhood vaccination.

Choose to send reminders:

● Only to children who have had a previous vaccination at your practice (plus those aged 2 months) or all children due for vaccination.

● Any time between 28 days before to 28 days after the due date (default is 7 days before).

28 days before — Due Date — 28 days after

Software Compatibility

SmartVax is compatible with a range of practice software

● **Medical Director**   ● **PractiX**

● **Best Practice**   ● **MedTech**

● **Zedmed**   ● **WINVaccs**

● **ImPS**

Increase your childhood immunisation rates using Australia's most intelligent SMS vaccine reminder system
